

Managerial Communication

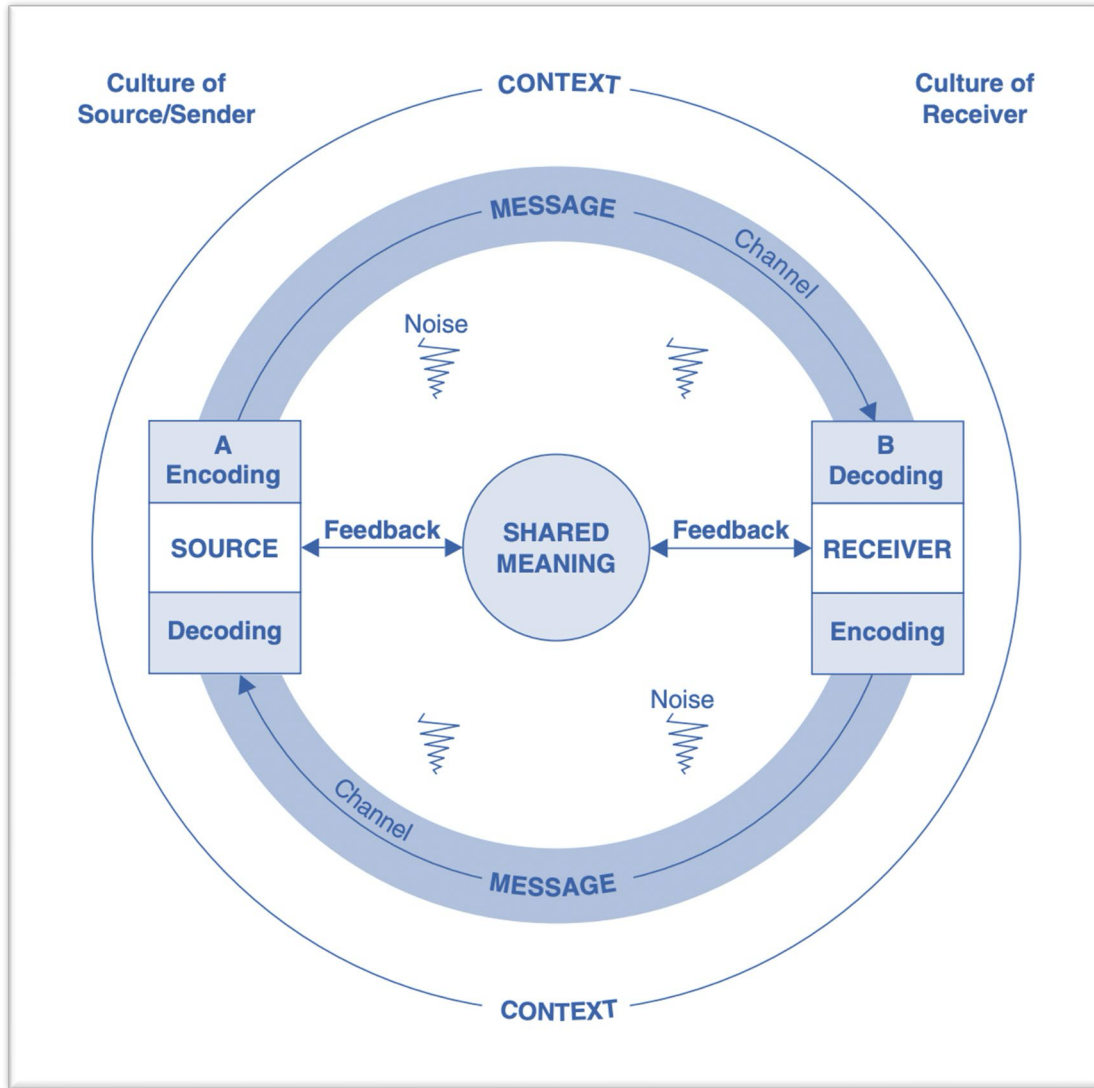

Session 1 - August 12, 2026

Prof Vaibhavi Kulkarni

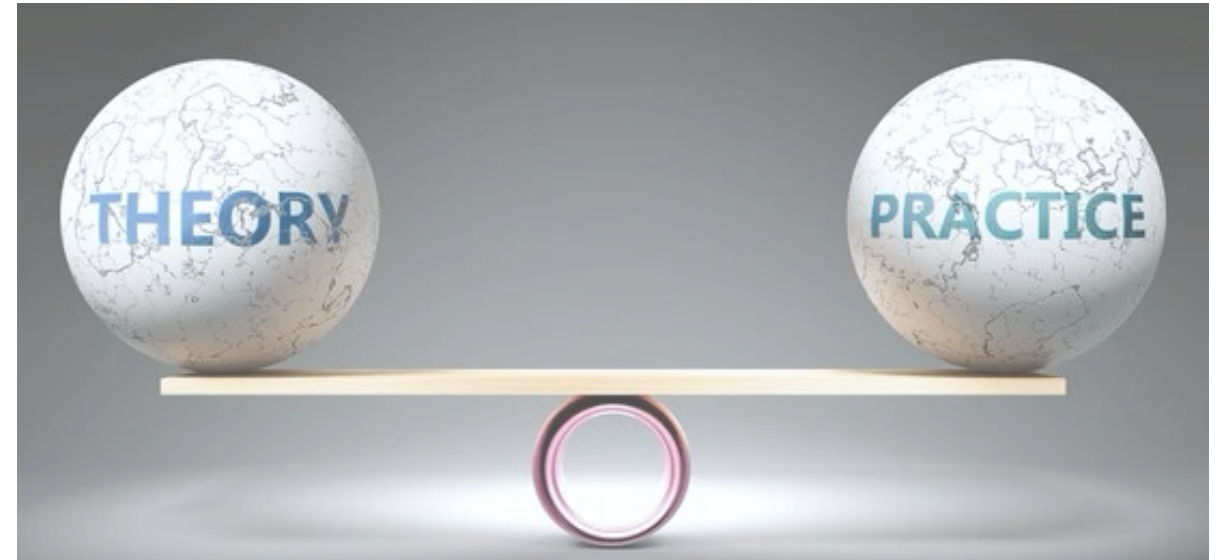

No model can completely represent the process of communication, any more than a map can capture your neighbourhood

Having a map of the neighbourhood is not the same as knowing the neighbourhood

How does
Communication
Work?

The Interactive Communication Process Model

- Role of Noise
- *External, Physiological, Psychological*

Communication Principles

- Communicators create meaning through interaction
 - Mutual influence
- Communication can be intentional and unintentional
 - All behaviour has communicative value
- Communication is by and large irreversible

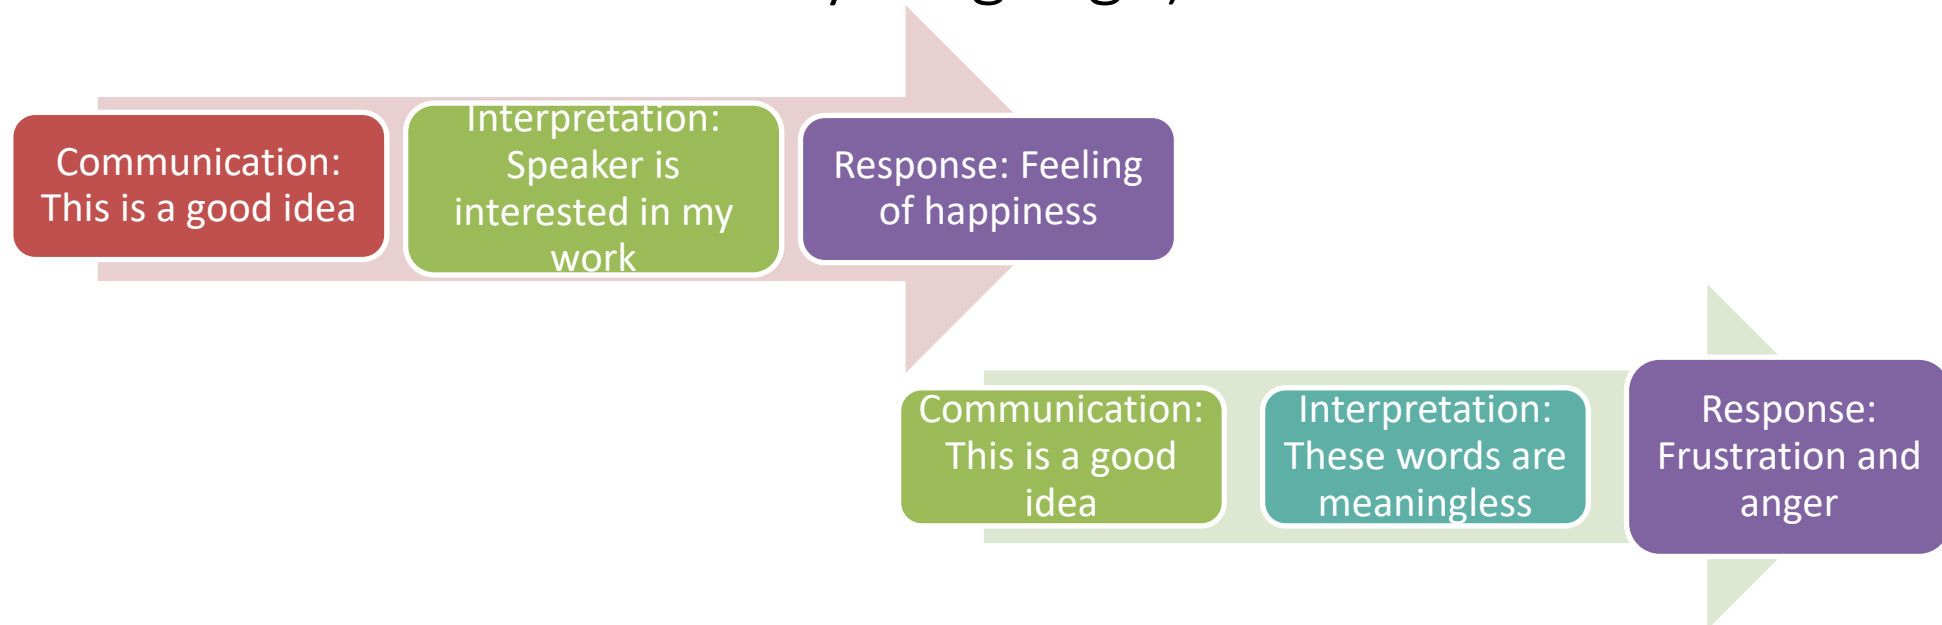

Communication Principles

- Communication has a content dimension and relational dimension
 - *“Please pass the butter”*
 - *“Thanks a lot”*
 - *“You forgot to check your messages”*
 - *“I can’t talk now, I am busy”*

Interpretive Model of Communication

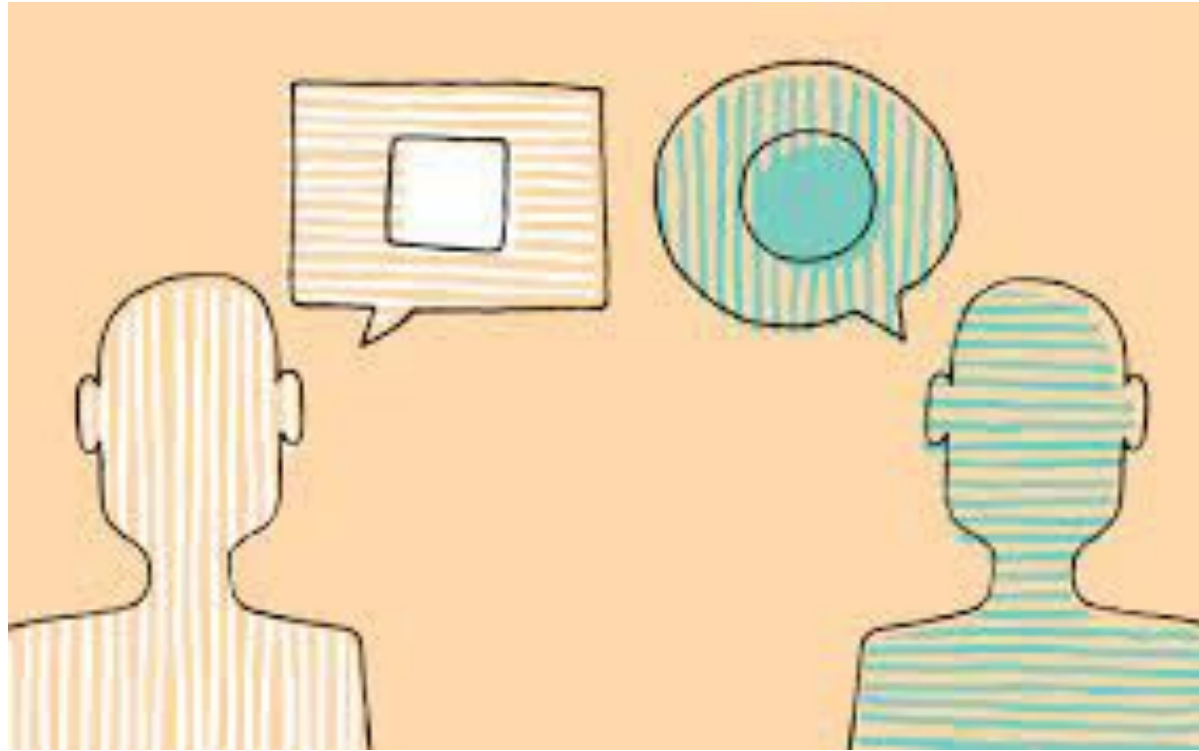

- Problematizes traditional notion of communication (Focus on sender's words and body language)

Interpretive nature of Communication

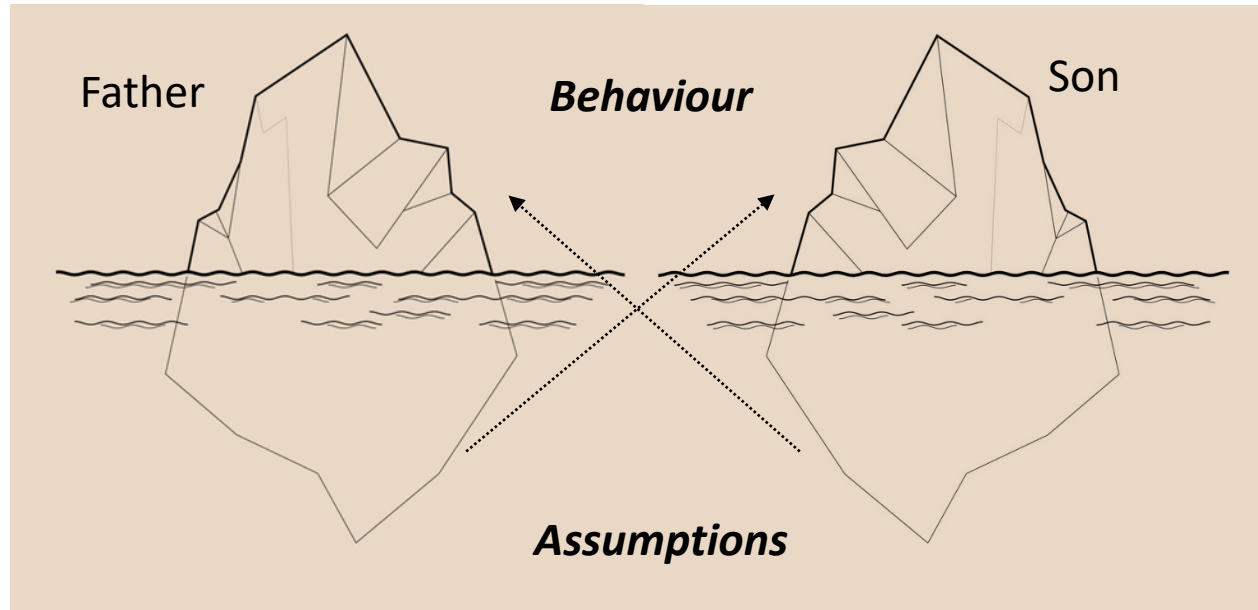

- We don't receive meaning, we *create* meaning

Understanding the Audience: Communication Breakdown

Assumptions and Behaviour

Father and Son: Communication Breakdown

- *What are some of the communication barriers that prevented the father and the son from communicating effectively?*

Understanding the Audience: Creating a Dialogue

Implications of the Interpretive Model

- We don't **receive** meaning, we ***create*** meaning
 - Communication requires shared assumptions
 - My perception
 - My perception of your perception
 - My perception of your perception of my perception

Communication Competence

- Understanding the Audience
- Adaptability
- Empathy / Perspective taking
- Self Monitoring
 - “I’m losing audience interest.”
 - “I’d better speak up now.”
 - “This approach is working well. I’ll keep it up.”

That's it for today!

Any questions?
