LEADER?

COMMUNICATING WITH PEERS: FRAMING

VALUE LADEN FRAMES

- Allow you to define a situation and make it credible
- Truth Frames: Statements of fact – “This *is* crucial for our success... we *are* skilled / accomplished”
- Symbolic, value-laden, audience centric, *ambiguous* frames with broad appeal
- Reference to core values / culture / norms that increase legitimacy

- **Gain Loss Frames**

Defining the situation in terms of what you will gain / lose

- **Contrast Frames**

Defining the situation by contrasting it with something else

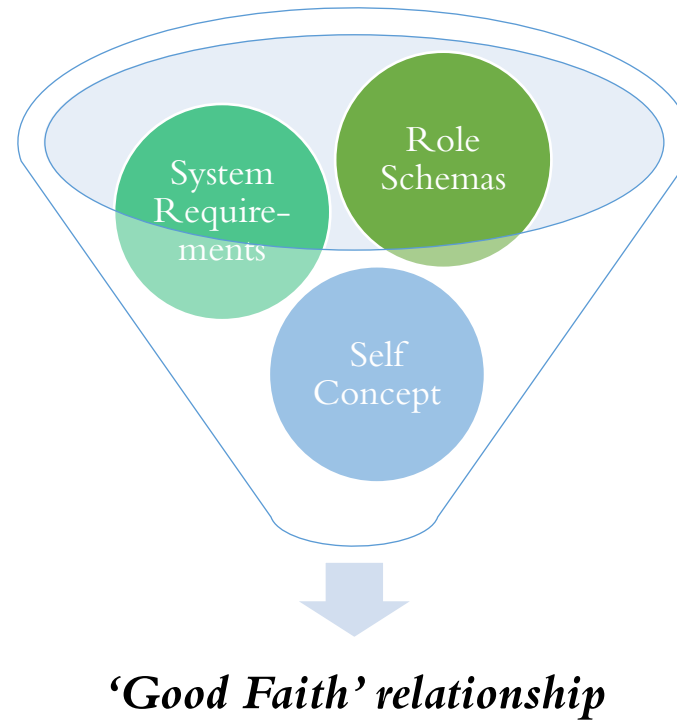

RATIONAL
FRAMES

WHY IS IMPLEMENTING CHANGE SO DIFFICULT?

- Change Resistance
 - ‘Rational’ and Non-Rational and Management factors
- Organizational and Individual Uncertainty
 - Uncertainty Reduction Strategies:
Passive, Active, Interactive
- Management factors: Breaking good faith relationship

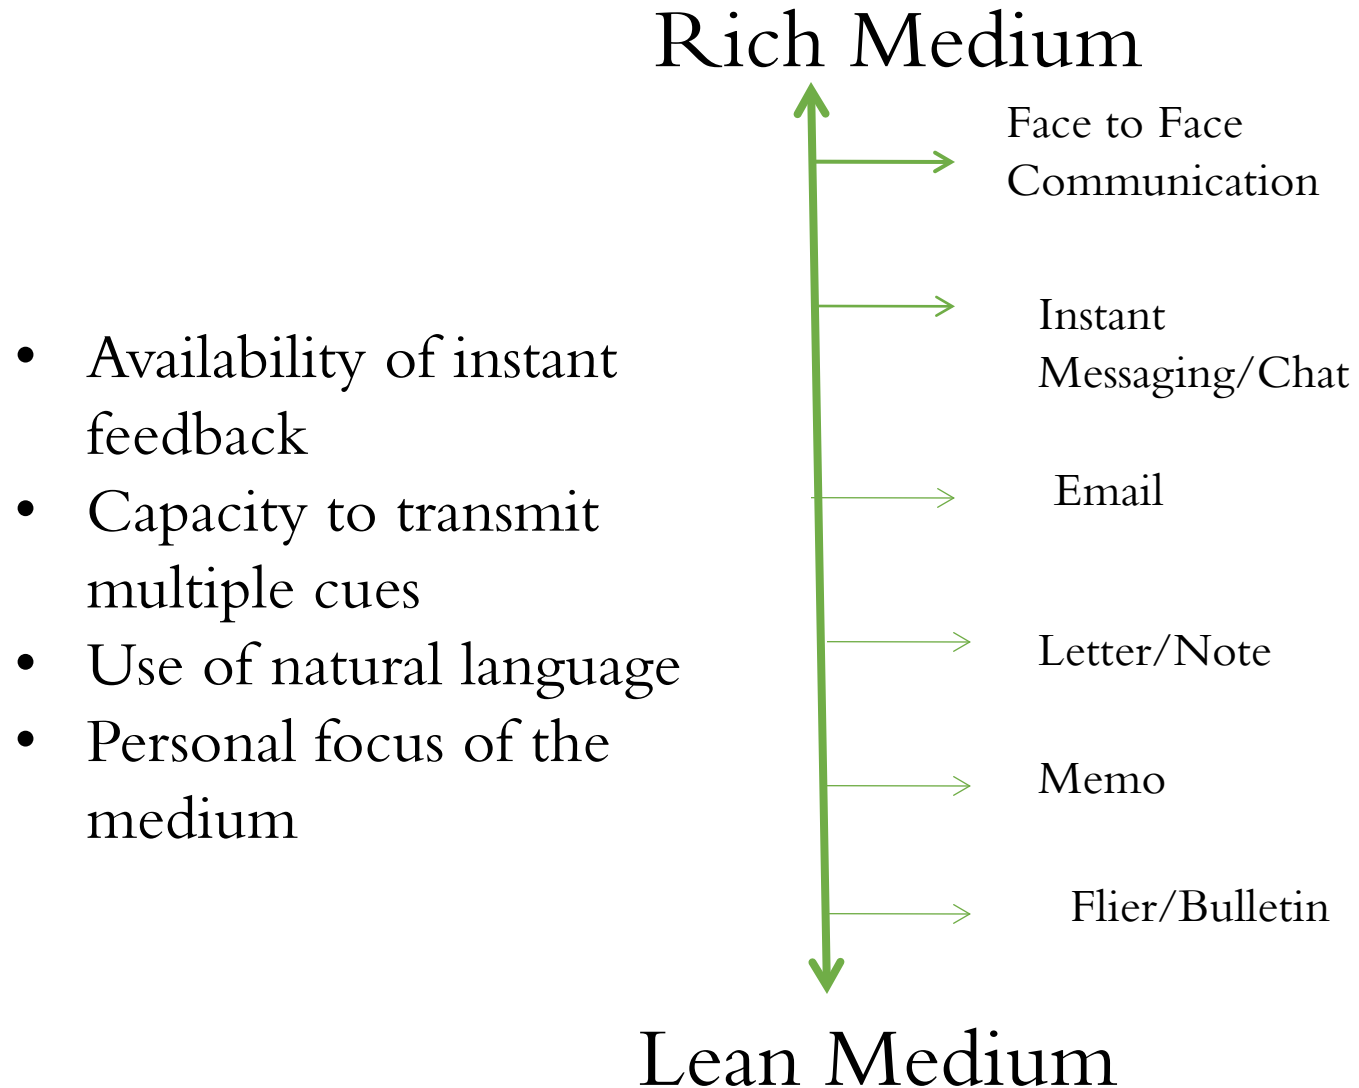

WHAT CAUSED RESISTANCE IN DRW TECH?

TOP-DOWN COMMUNICATION

	Communication for employee compliance	Communication for employee support and acceptance
Dissemination versus Solicitation of Feedback	Official view of plan/ purpose Responding to queries Correcting misinformation or addressing rumours	Soliciting and understanding different viewpoints Soliciting active participation for planning and implementing change
Message Sidedness	Focus on change-related benefits and positive outcomes Communicate the proposed change as advantageous to for all concerned	Focus on change benefits as well as some of the negatives surrounding the change Provide a realistic preview of change by communicating the challenges that employees may encounter
Blanketed versus Targeted messages	Sending out 'mass' or 'generic' messages to all employees regarding change	Crafting tailored messages for different employee groups, based on their interests and goals

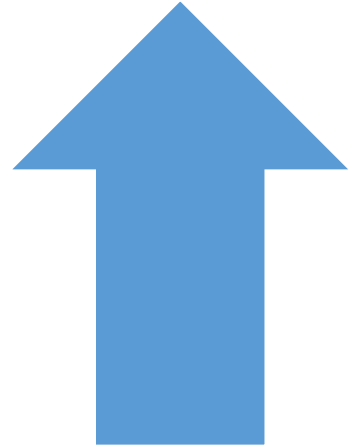

COMMUNICATION AND TECHNOLOGY

	Unambiguous Task	Ambiguous Task
Rich Media	Communication failure Data glut. Rich media used for routine tasks. Excess cues cause confusion and surplus meaning.	Effective communication Communication success because rich media match ambiguous tasks.
Lean Media	Effective communication Communication success because media low in richness match routine messages.	Communication failure Data starvation. Lean media used for ambiguous messages. Too few cues to capture message complexity.
