Product Orientation

Marketing Orientation

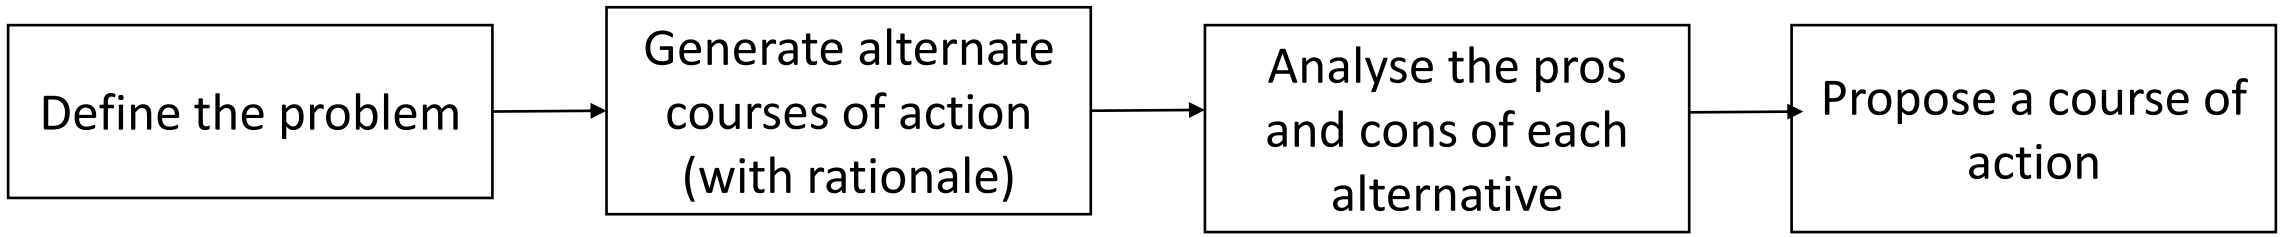

Over-arching framework of this course

What type of situations can you expect in Marketing cases?

- Success in T1. How to continue growth in T2? → **Performance and opportunity analysis**
- How to launch a new product in the market? → **Opportunity analysis**
- “Great” product. But not selling. → **Performance-gap analysis**
- Issues created by market players. How do I respond? → **Market-response analysis**
- Specific strategic/ tactical actions. → **Action-planning**

How to approach a case?

- Diagnose the root cause of the problem
- Who are the stakeholders? : 5 Cs
- Perceived value, needs of each stakeholder
- Industry analysis

- Courses of action in marketing
  - STP
  - 4Ps
  - Value proposition (OVP)

- Repercussions of each on value for the company
  - CLV
  - Triggers and barriers of 5Cs

- With rationale

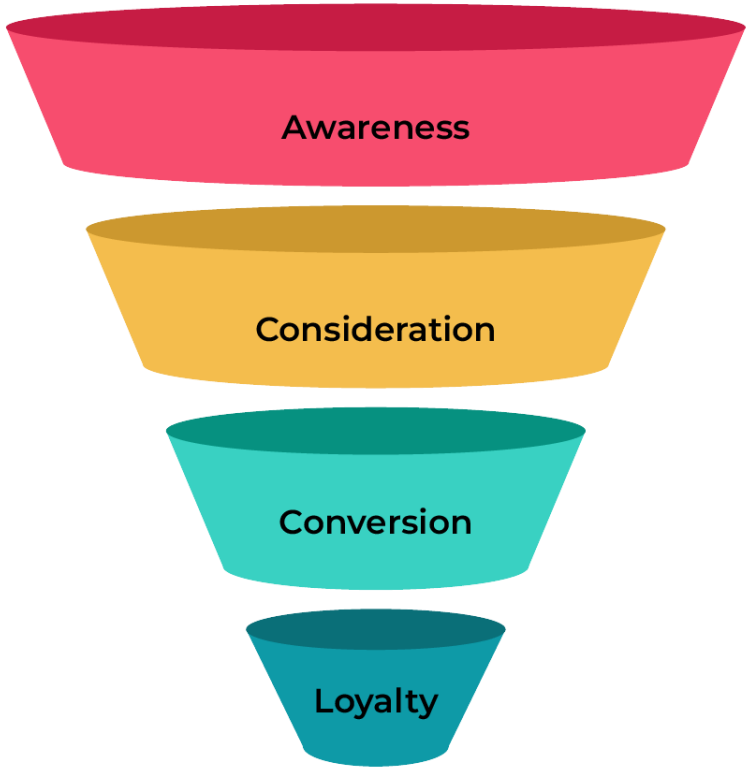

Rationale = Use data and arguments from the case; Clearly state your assumptions (if any)

Steps in analysis

1. Identify the marketing problem – category penetration? Which level of the funnel is the focus?
2. Situation analysis using 5Cs – list the key stakeholders and their perceived value (triggers and barriers – e.g., behavioral, psychological, monetary)
3. Segmentation – identify different bases and select the relevant one with rationale
4. Targeting – choose your target segment with rationale (e.g., CLV)
5. Positioning – identify competition set; map competitors, customer needs (laddering), your own product's attributes → arrive at a positioning statement/ value proposition; pricing strategy

Which situation is the case focusing on?
(Adoption funnel)

- Funnel
- Churn at every level
- Triggers and Barriers at every level
- Which level is the case's problem focusing on?

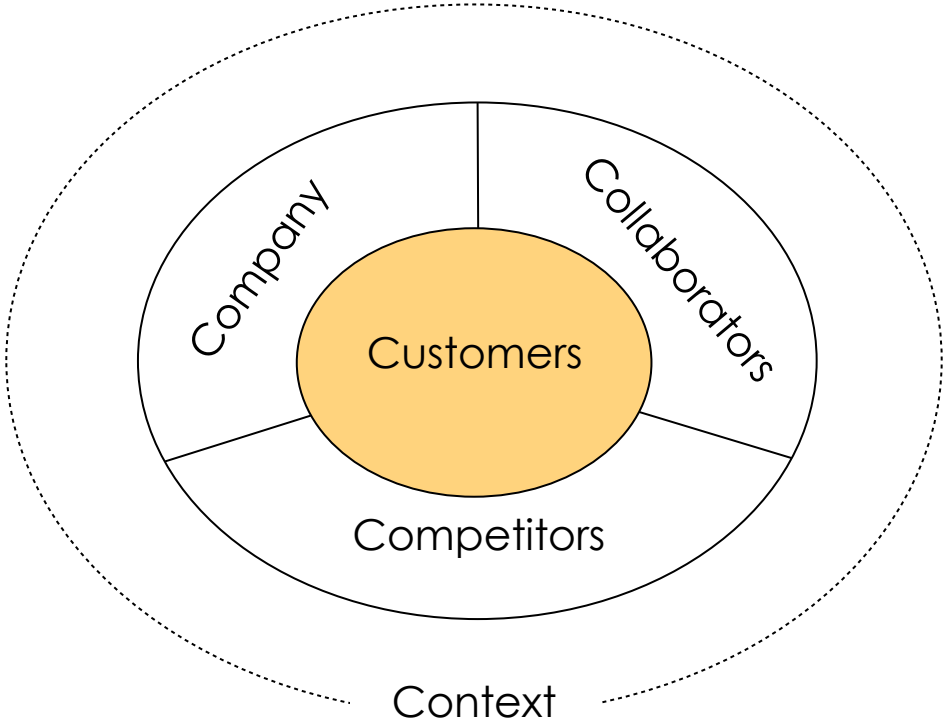

Which situation is the case focusing on?
(Ansoff Matrix)

Which type of company is the case focusing on?
Market Leader vs. Follower vs. Nicher

The 5-C Framework

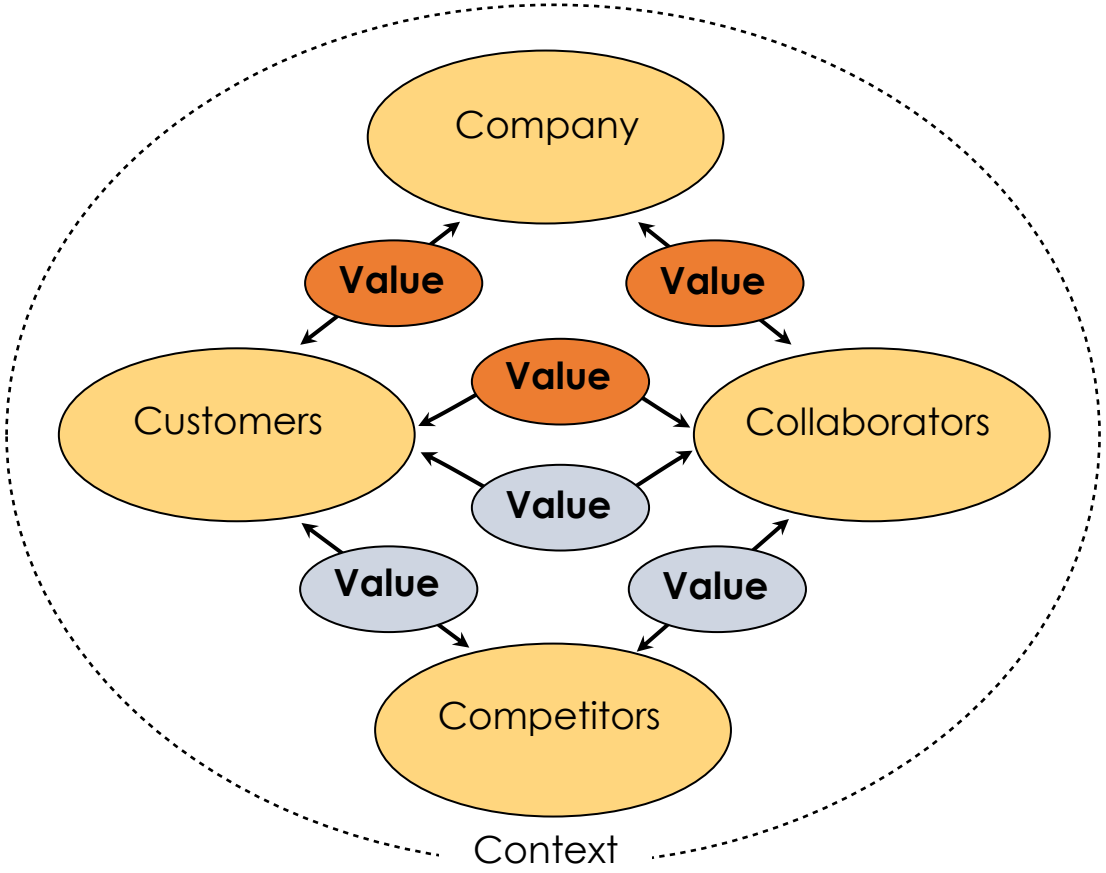

Identify all the market players in the case

Value Exchange in 5C

Determine the perceived value of each player

© 2018 Alexander Chernev

Perceived Value – for each stakeholder

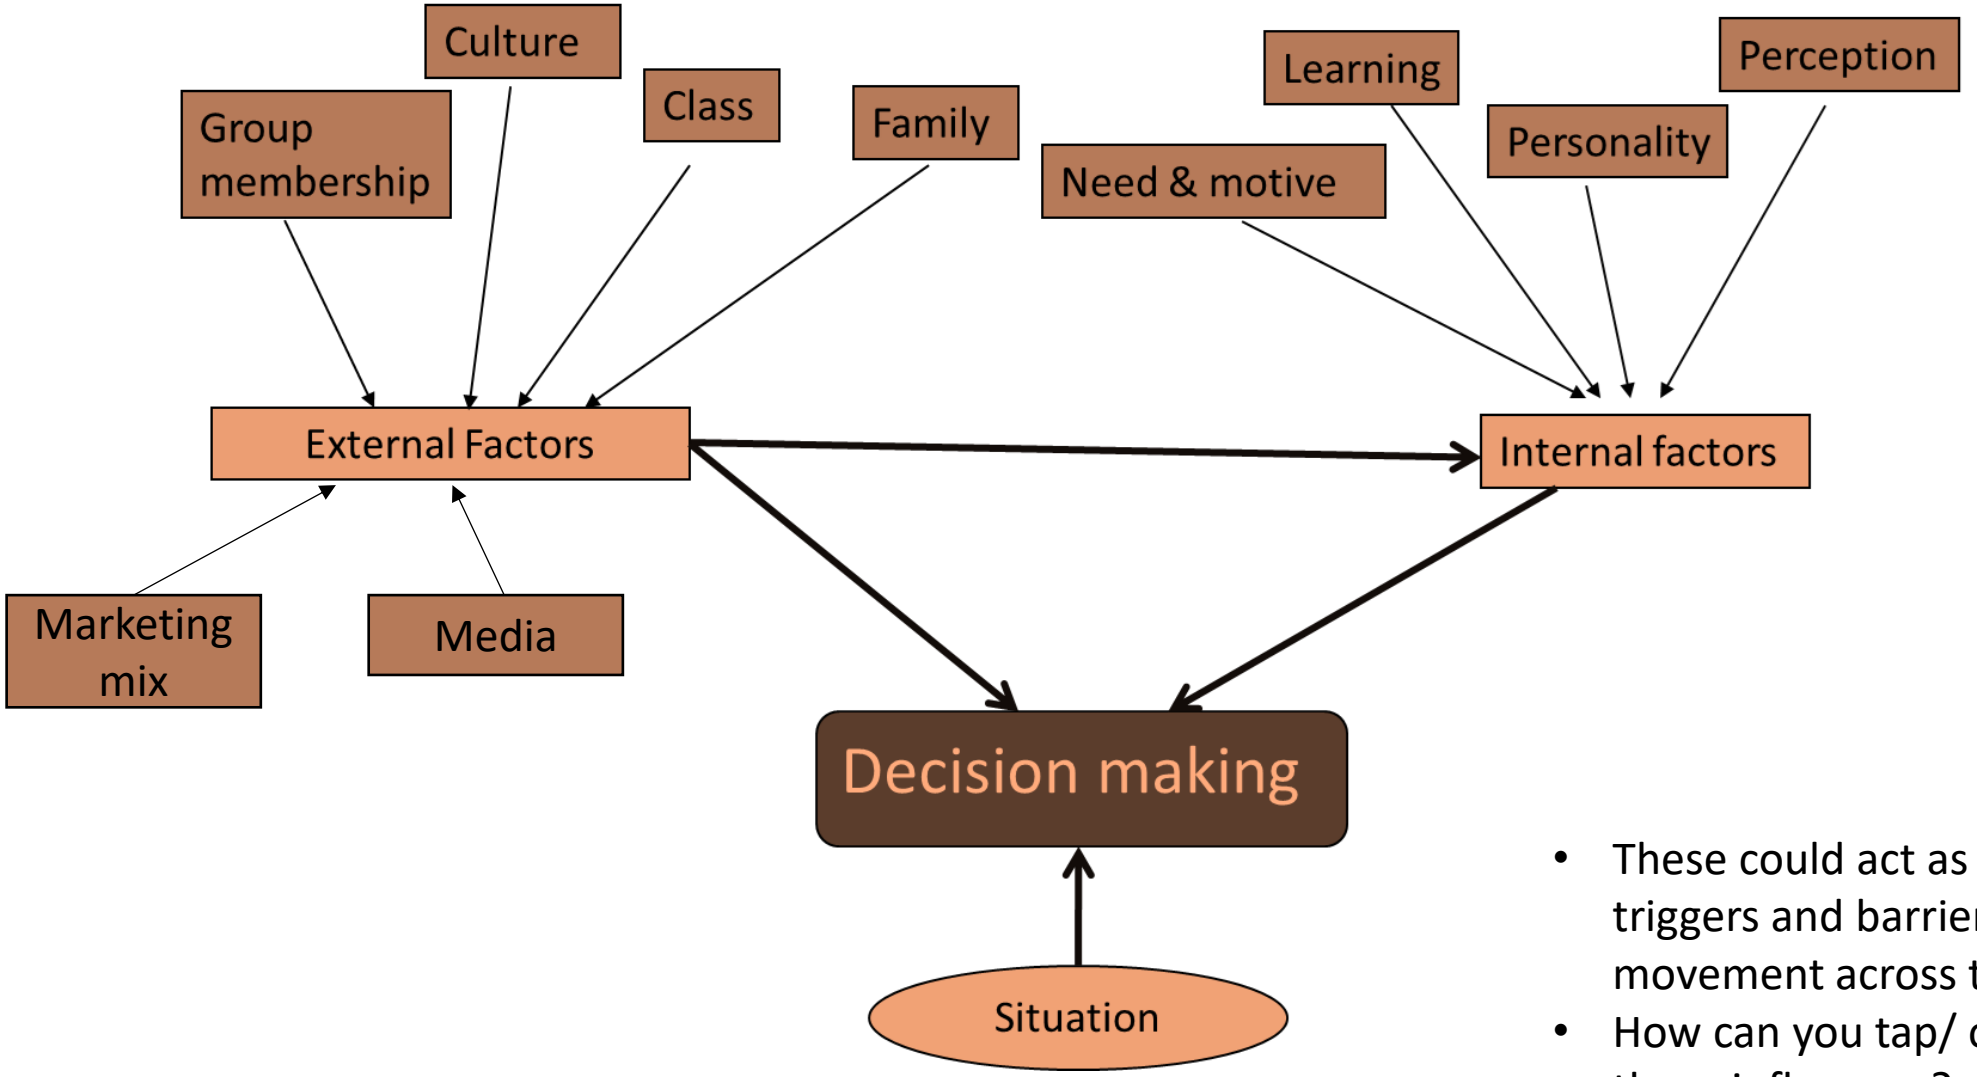

How do we measure perceived value?

Collaborator perceived value?

Company perceived value?

CLV of customers
CLV of collaborators

What Influences Perceived Value?

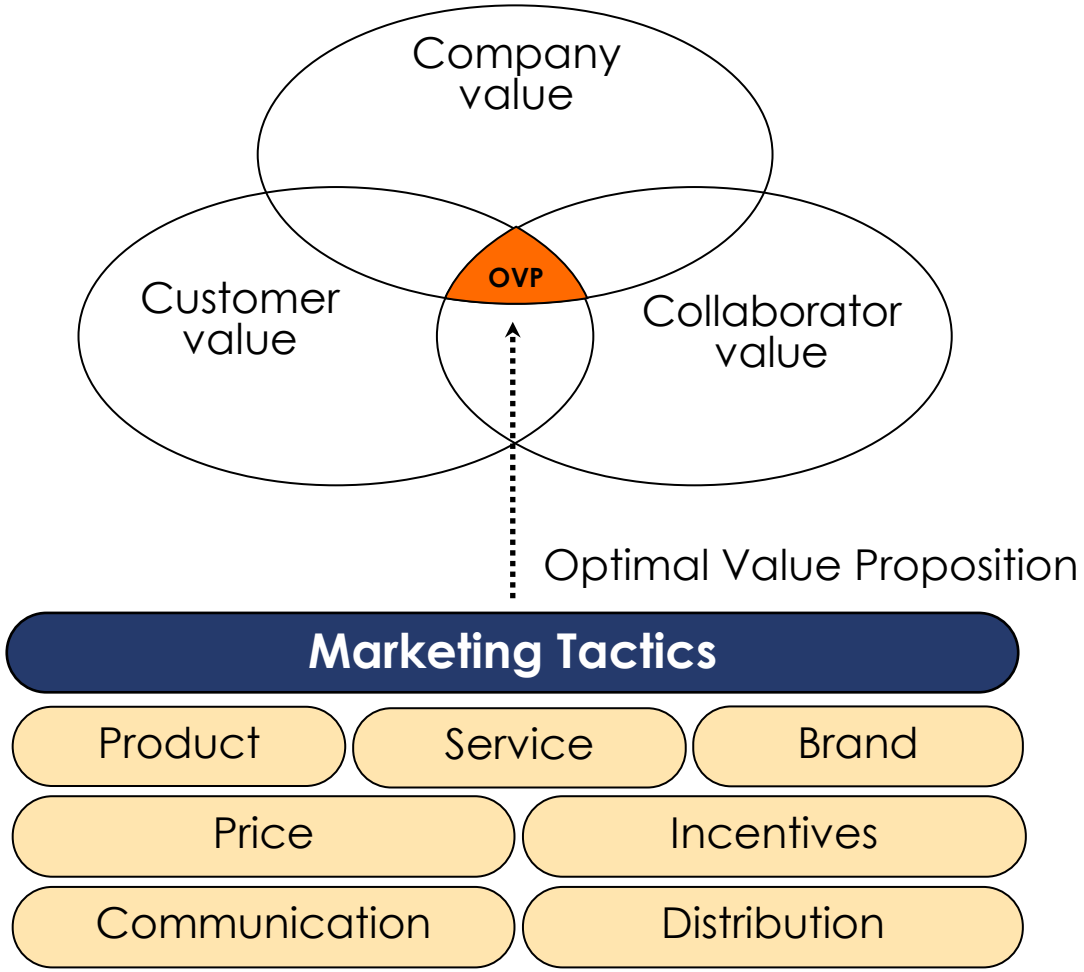

- These could act as potential triggers and barriers in the movement across the funnel
- How can you tap/ overcome these influences?

Relevant CB concepts that can be applied in analyzing perceived value

- Type of purchase – grudge, impulse, hedonic, utilitarian
- Level of involvement – high vs. low
- Price sensitivity
- Needs – functional, emotional, status
- Barriers to behaviour change (e.g., adoption of technology) – learning costs, cultural barriers
- Perception – difference between actual value and perceived value

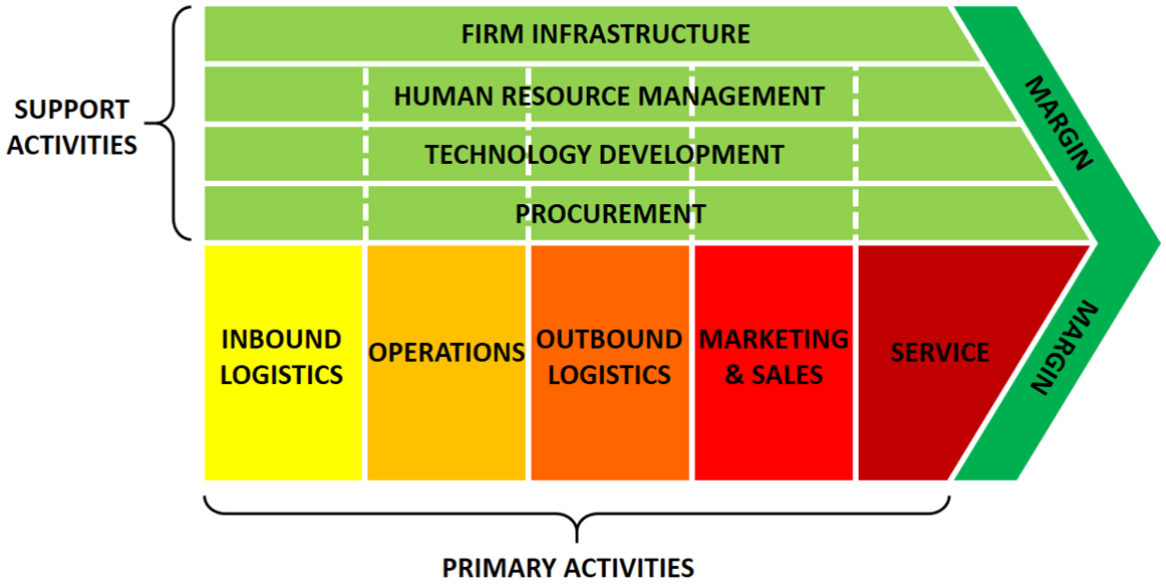

The 3-V Market Value Principle

Value Chain Framework

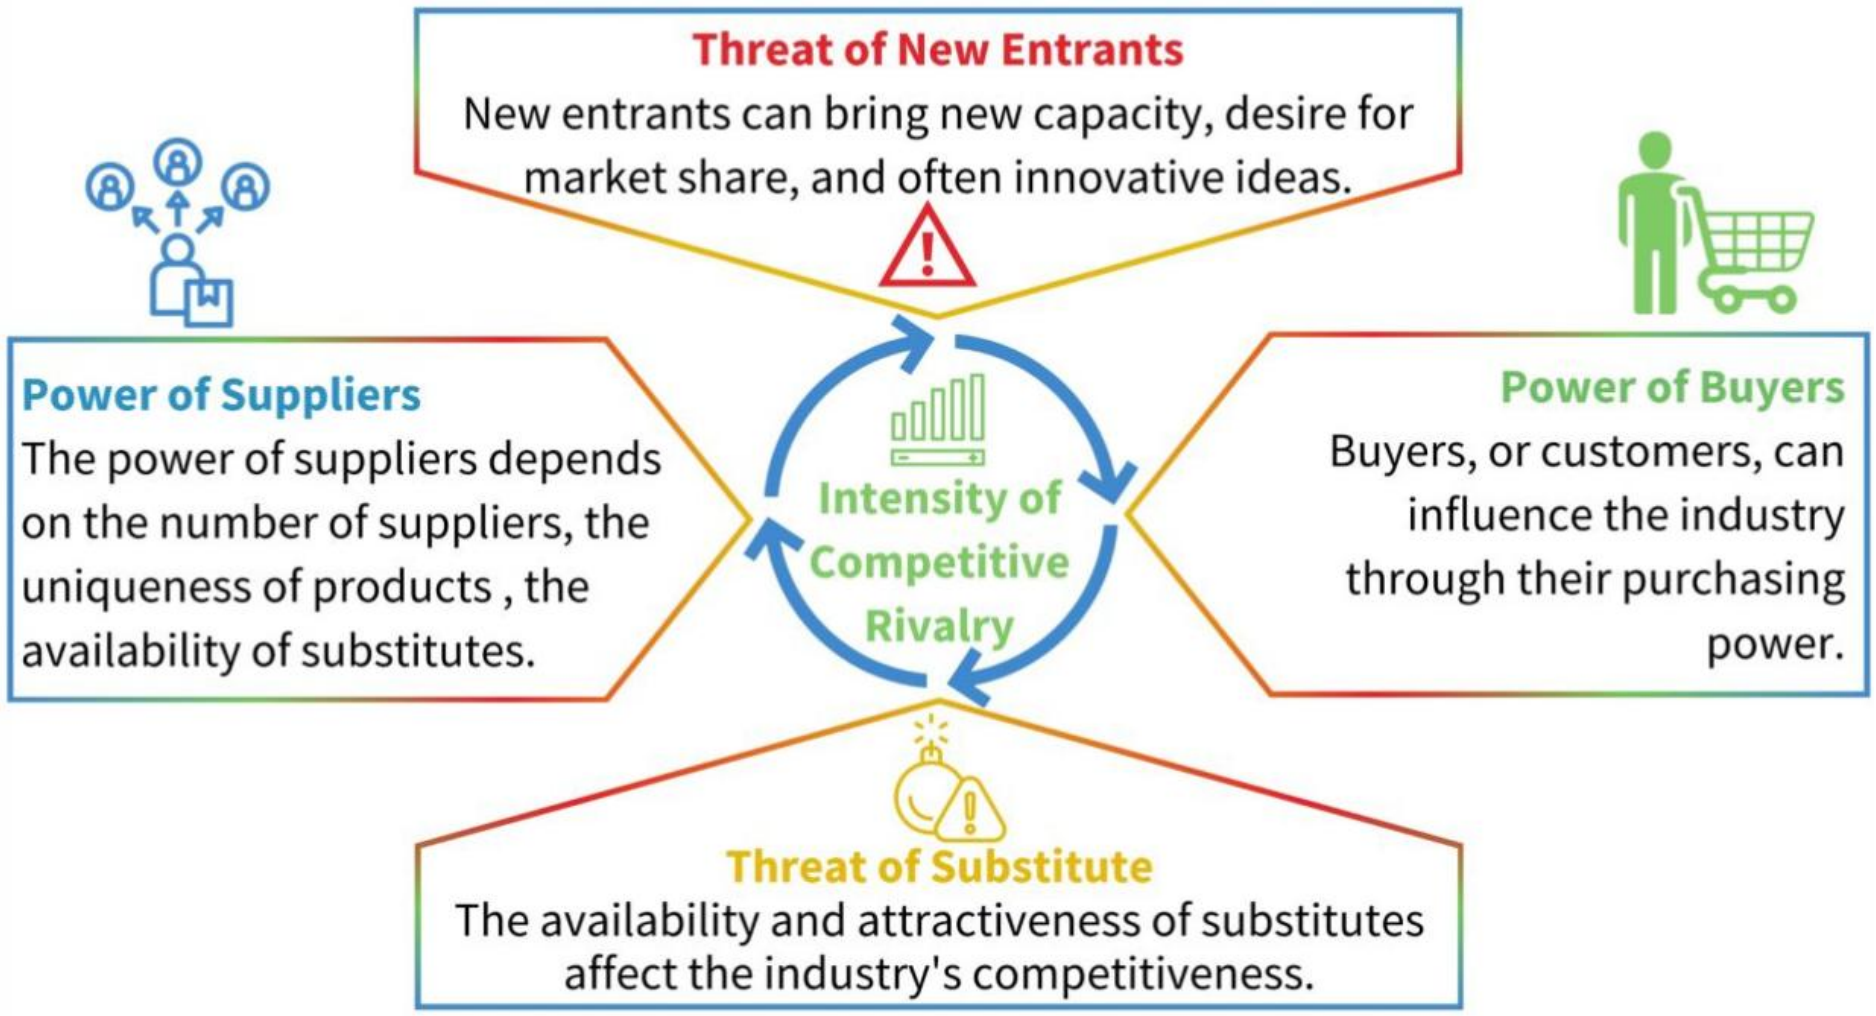

Firm Value Chain

Industry Value Chain

Porter’s 5 Forces – Influences Value Exchange

Does everyone value the same things equally?

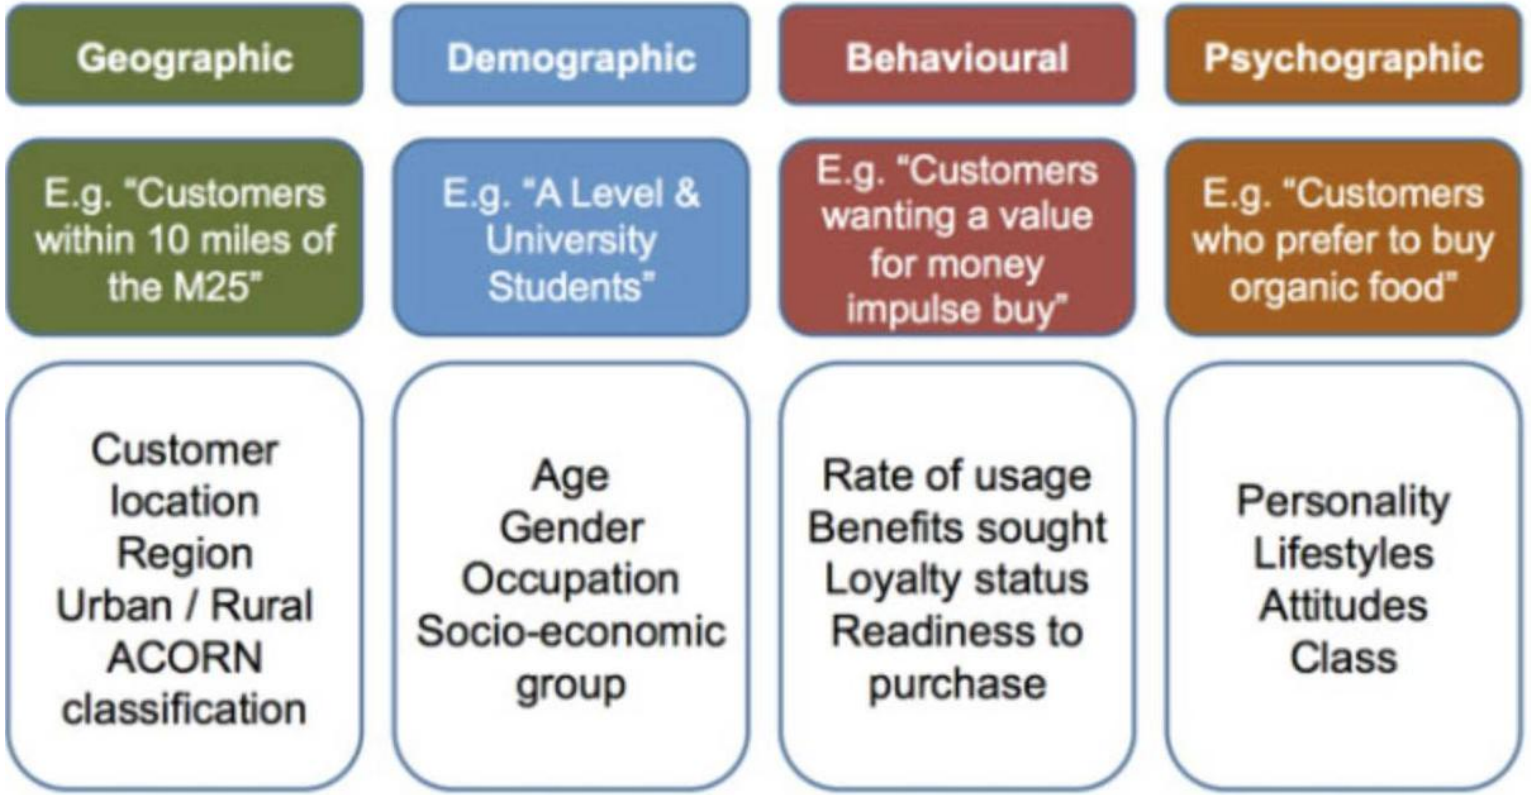

STP

1. **Segmentation**: How do we divide everyone into homogeneous segments?
2. **Targeting:** Which segment(s) do we cater to? Why?
3. **Positioning:** How do we create a distinct image of our brand in the chosen segments' mind?

Customers and Collaborators can be segmented

Bases for segmentation

B2C

Vs.

B2B?

What are different psychographic variables? How do we use them?

How do we use data to segment the market?

The buying center

- List the different stakeholders and their roles
- Which stakeholder is the key trigger/barrier in the case?
- How can you deliver perceived value to them?

- ✓ Initiators
- ✓ Users
- ✓ Influencers
- ✓ Deciders
- ✓ Approvers
- ✓ Buyers
- ✓ Gatekeepers

Criteria for Targeting

A good segment is:

- definable, accessible, actionable, and profitable (growth potential)
- CLV
- Company objectives

Positioning process

- Consumer needs (of your chosen Target segment) – laddering from functional to emotional, symbolic.
- Competitor mapping on perceptual map – Differentiate (avoid crowded spaces)
- Own product attributes mapping – reason to believe (RTB)
- Identify perceptual barriers which you can subvert through positioning
- Develop a positioning statement
- 4Ps are tactics used to deploy positioning

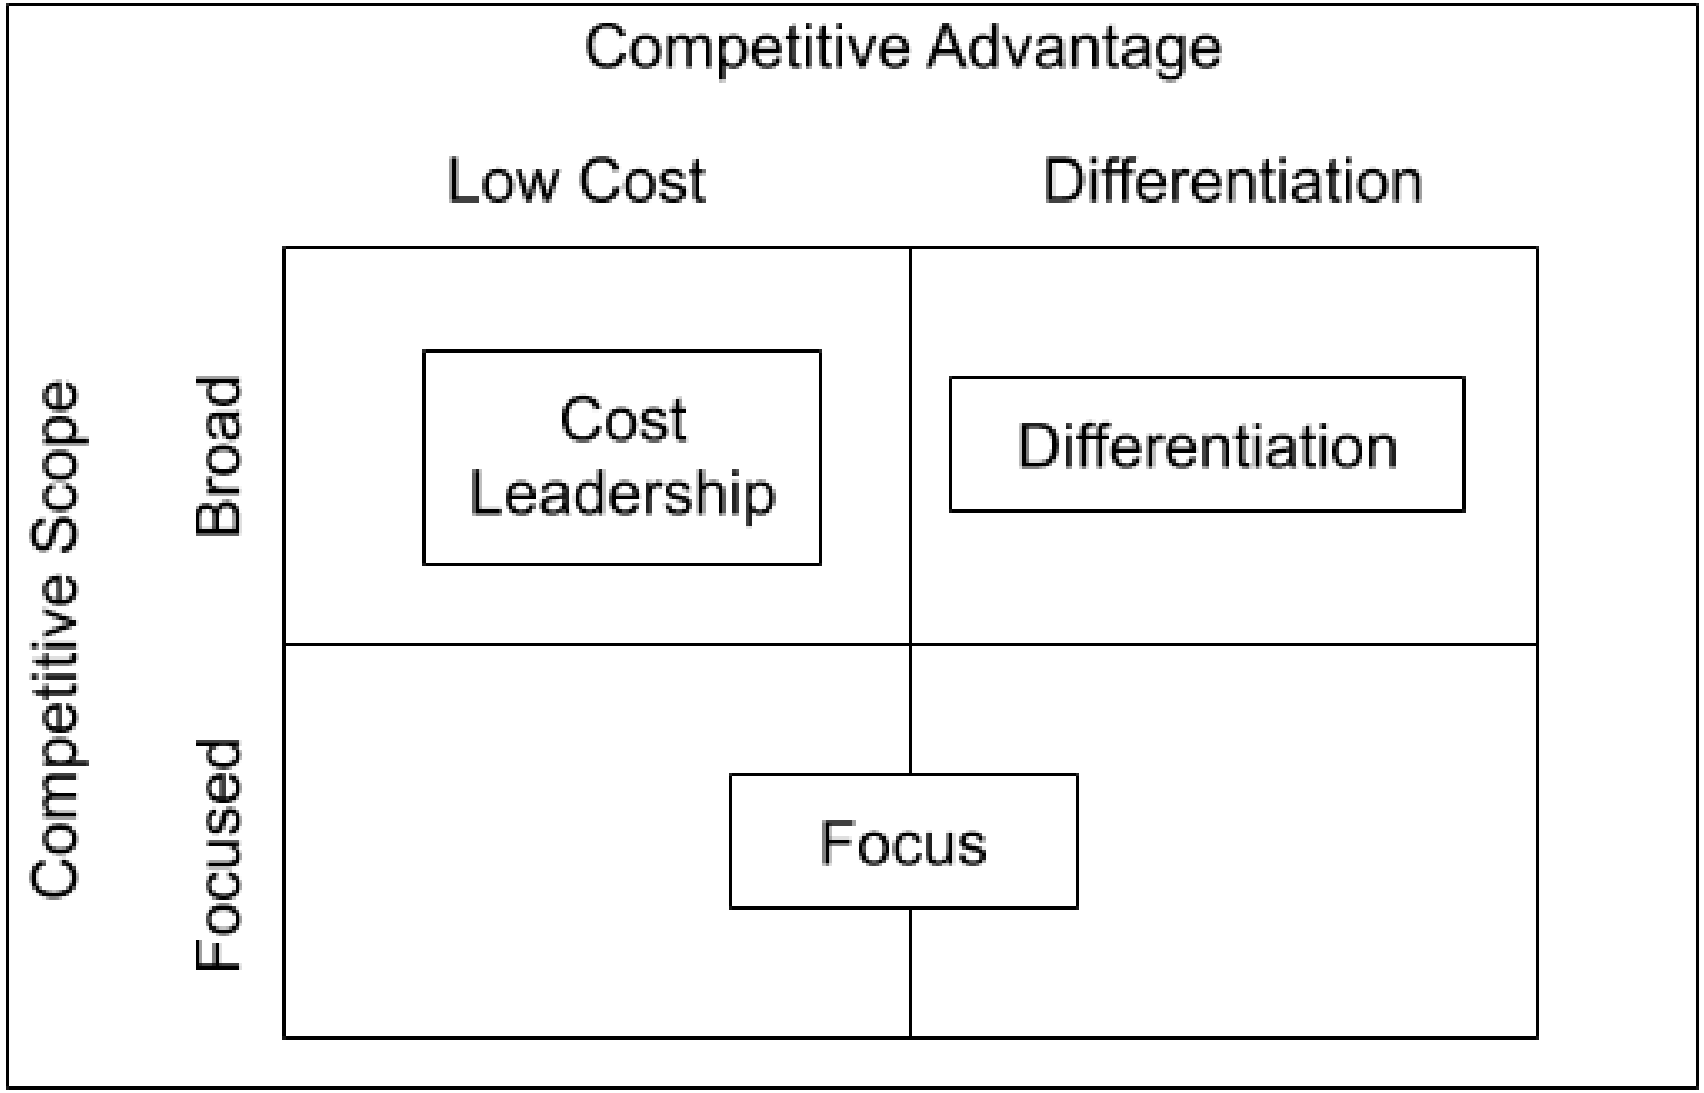

Positioning Statement Template

For _____ (target), _____ (brand) is the _____ (category)

that is the _____ (point of difference)

so they can _____ (end benefit)

because _____ (reason to believe).

Commodity vs. Brand?

Perceptual Maps

Healthy Food (9) Junk Food (1)

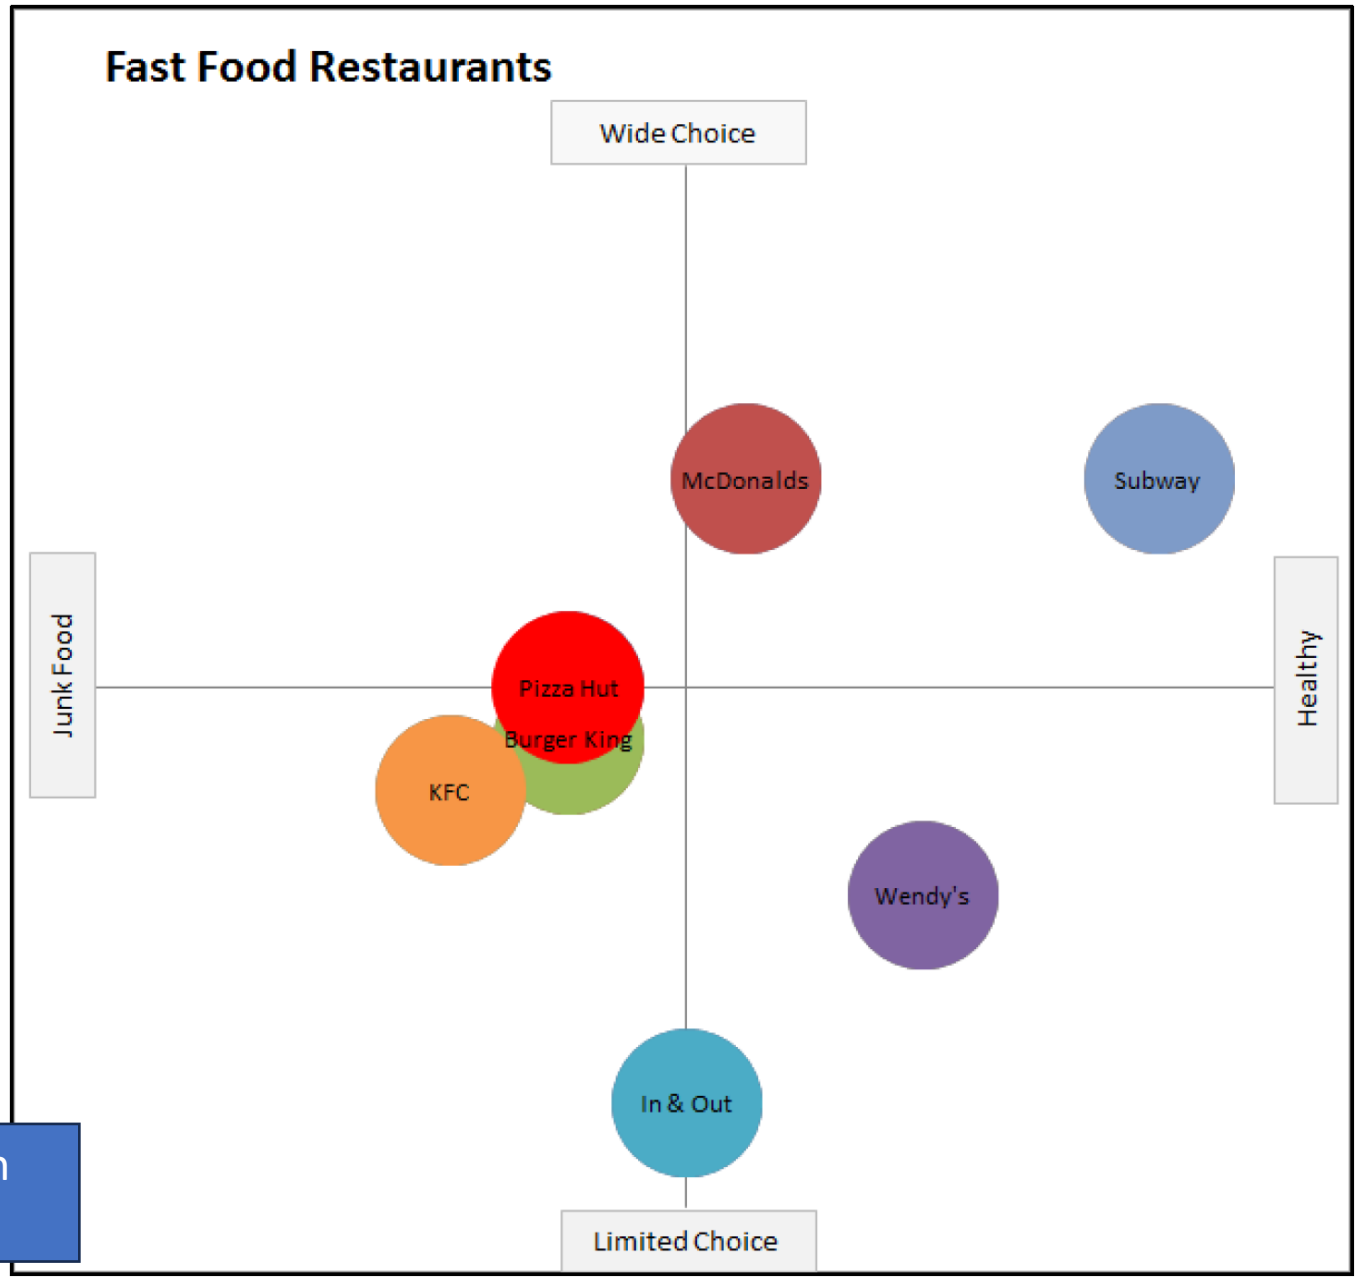

- McDonalds = 5.5
- Burger King = 4
- Wendy's = 7
- In & Out = 5
- KFC = 3
- Subway = 9
- Pizza Hut = 4

Wide Choice (9) Limited Choice (1)

- McDonalds = 7
- Burger King = 4.5
- Wendy's = 3
- In & Out = 1
- KFC = 4
- Subway = 7
- Pizza Hut = 5

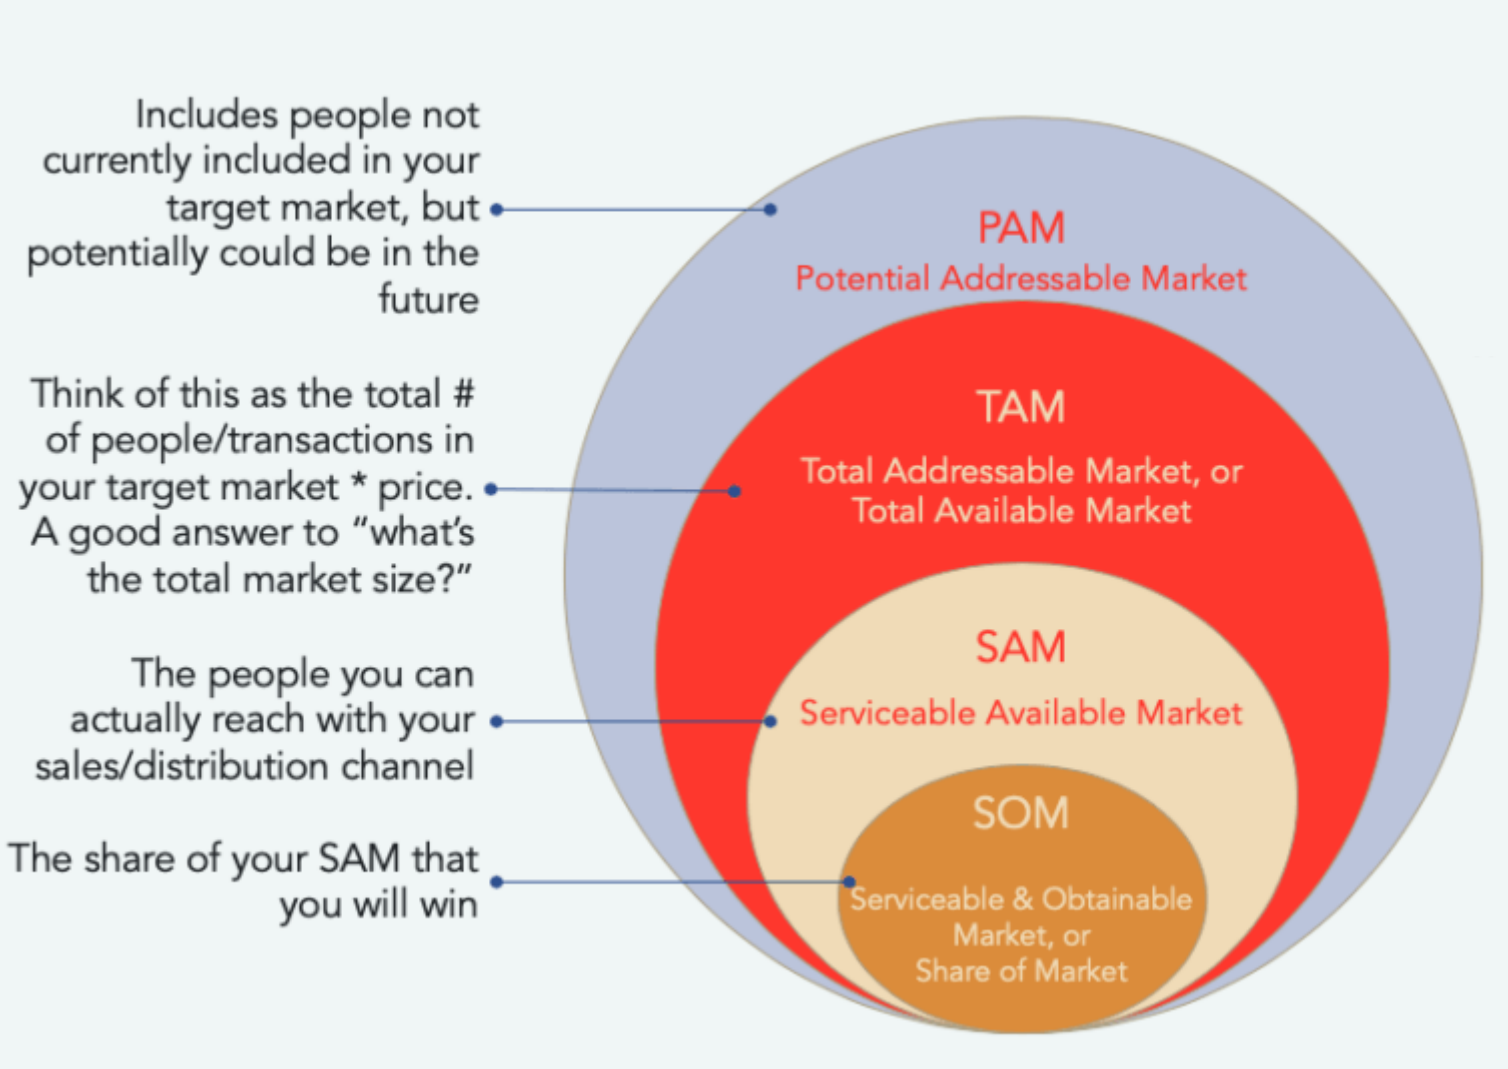

For Adults (9) For kids (1)

- McDonalds = 3
- Burger King= 6
- Wendy's = 7
- In & Out = 8

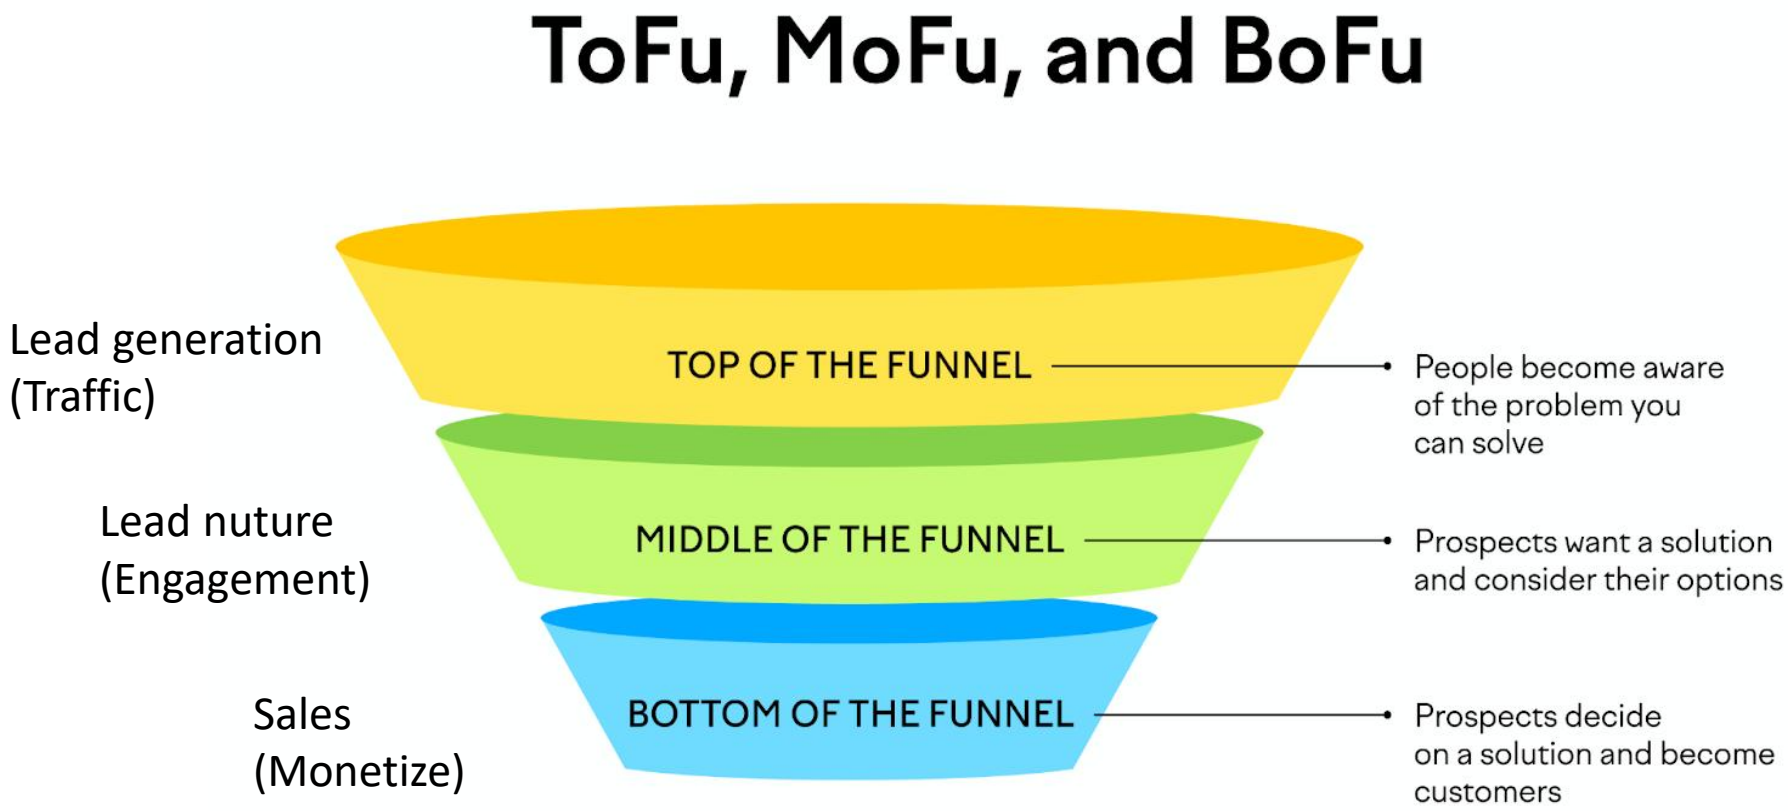

What are the different ways in which we can measure brand perception?

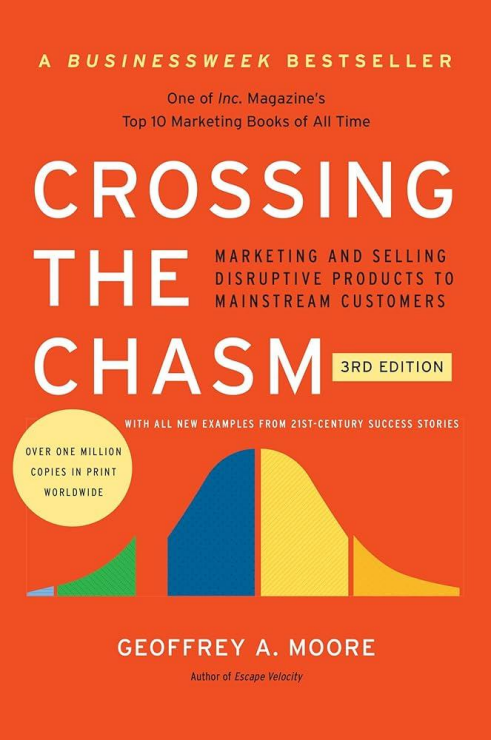

Market Sizing

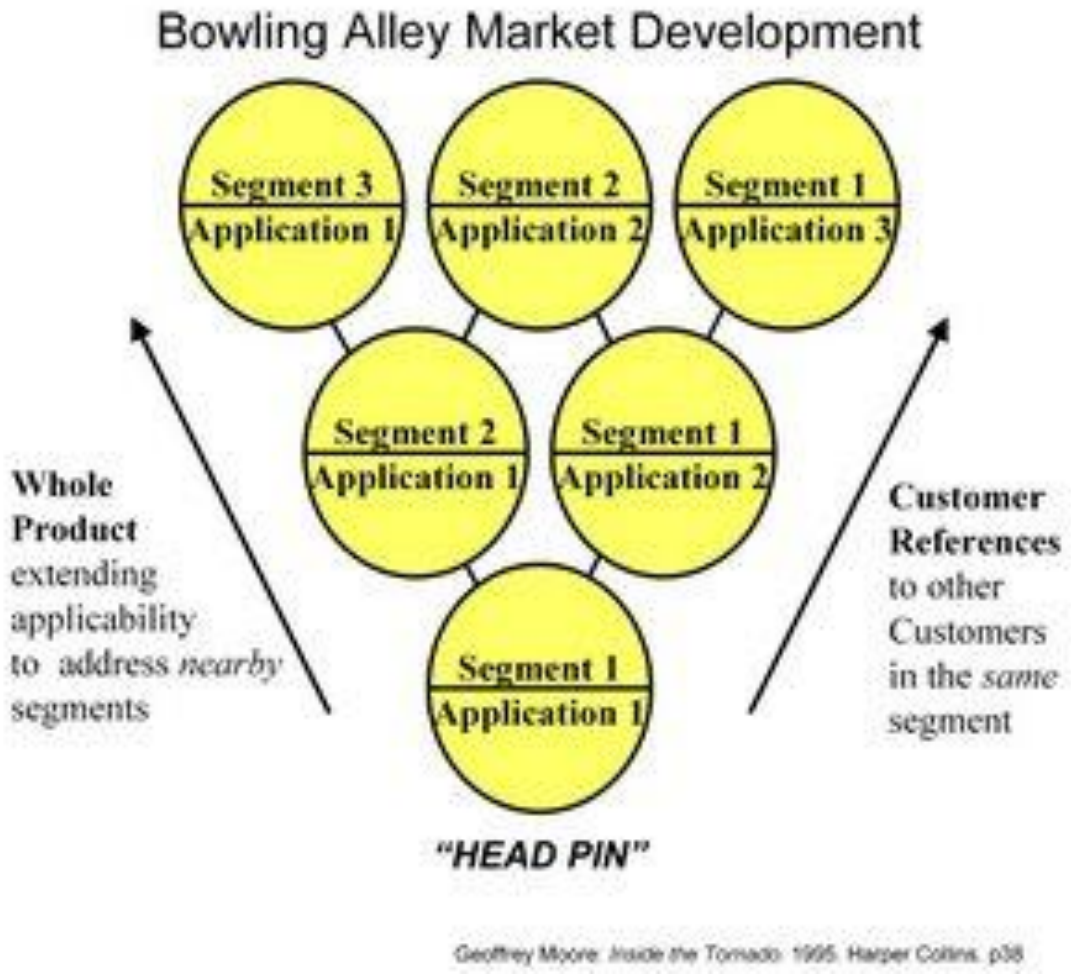

Segmentation approach

Growth marketing: Inbound Marketing Funnel approach

Market Creation
